### About this show

Iván Navarro invests TEMPLON Paris' space with 'Cyclops', a luminous odyssey between myth, cosmos and power.

As his ambitious project for the Grand Paris Express, which has been in development for nearly a decade, is set to be unveiled in 2026, Chilean artist Iván Navarro, renowned for his light works, makes his first show in the space on Rue du Grenier-Saint-Lazare. For the Cyclops exhibition, he is displaying a series of 14 electric sculptures, which transform the space through hypnotic optical effects. Oscillating between celestial phenomena and reflections on power relations, Navarro offers an intense sensory and symbolic immersion.
